

## Matroid theory: exercise sheet 11

1. Let  $M_1$  and  $M_2$  be regular matroids with ground sets  $E_1$  and  $E_2$  such that  $E_1 \cap E_2$  is a triangle in both  $M_1$  and  $M_2$ . Show that  $M_1 \oplus_{\mathbb{F}_2} M_2$  is regular.
- 2.\* Let  $M$  be a regular matroid and  $k$  a field. Show that any presentation of  $M$  over  $k$  is equivalent to a regular one.
3. Find a grip presenting a connected matroid with 8 elements which is not a wheel.
4. Let  $G$  be a connected graph and let  $x, y, z$  and  $t$  be distinct vertices of  $G$  such that  $z$  and  $t$  lie in different components of  $G - \{x, y\}$ . Show that  $M(G, \{x, y, z, t\})$  is graphic.
